ENTERTAIN YOUR SOUL, LIVE THE FUTURE

A World of Unlimited Luxury & Comfort

Creativity & Smartness...

welcome to the world of eVISION

True pleasure is rare; it is the prerogative of only the chosen ones who can afford the finest life has to offer. It's amazing to live in the world of creativity and smartness, a world where everything is in your hands. It will be great to relocate the spirit of imaginary to the real life, we guarantee for you that.

eVision is the market leader in automation, high-end audio-video, communication systems, lighting control, control systems, security systems, and video conferencing solutions as well as smart and luxury technologies. We integrate the latest technologies into one seamless solution.

From the needs assessment to the training stage, we are with you at every step of the way. We base our creations on your needs and desires. We design our best solutions to meet and exceed the highest expectations.

eVision is a part of Saudi Electronic Trading Company (SETRA), and is a member of:

- CEDIA custom electronic design & installation association

- KONNEX organization for home and building control with the only worldwide approved INTERNATIONAL STANDARD for home- and building control.
- InfoComm International[®] is the leading association serving the professional AV communications industry worldwide.

eVision provides Complete system design and consultancy, Installation, programming, testing and commissioning, Training on the site, Technical support and Service after sales for both the corporate and residential sectors

Corporate Systems

. A Con

eVision

There's more technology and systems on the network in every commercial building today than ever before.

Fully networked, connected buildings need a robust digital infrastructure, a powerful engine to drive all the data and content; and they need flexible software to manage them all. Figuring out all the pieces you need, and how to put them all together to make it all work, is hard. That's why we put it all together for you. We make it easy and provide you with many solutions covering various technical branches with a maximum of flexibility, comfort, safety, and profitability. We provide total environmental control to conserve energy and lower costs by combining automated dimming and daylight harvesting with power switching and load shedding.

We provide Advanced features such as room scheduling, room combining, load shedding, daylight harvesting, and personal workspace control.

eVision is the definitive source for presenting, controlling and managing information. From conference room to the hotel room, eVision offers simplicity, efficiency, and productivity with cost-effective solutions.

A CAN

Office Building

personal comfort.

Monitor and control HVAC, shades, audio/video distribution and presentation systems throughout the building from the same touch panel. eVision touch panels offer a global view and management of all systems and devices building-wide from a centralized command center, or local controls from touch panels in each room.

eVision delivers complete building management for maximum energy and operational efficiency.

Monitor, manage and control all the environmental systems throughout the facility on a single platform to maximize energy and cost savings. Integrated motion detection and occupancy sensors turn lights in rooms only when in use. Balance the need for light and climate control. Use daylight harvesting to optimize the use of natural light, while also managing room temperature to provide energy efficiency and

Today's modern commercial buildings incorporate more technology than ever. Lighting control in these facilities is increasingly complex, balancing a variety of requirements such as life safety, energy conservation, comfort and productivity. The need to monitor, manage and control disparate lighting systems such as emergency, task, presentation, architectural and natural light simply and efficiently on a

single platform is paramount.

A CAN

eVision provides the most robust, efficient and scalable solutions for centralized and distributed commercial lighting systems. eVision seamlessly integrates separate environmental systems, lighting and shade control with HVAC, security, audio/video distribution and multimedia presentation on a common platform in an efficient, costeffective way, achieving a synergy that delivers optimal control and savings

Lighting Control

We integrate all control features associated with lighting including: occupancy detection, dimming, daylight linking, scene-setting and blind control. The solution provides automatic means to optimise lighting based on: time, intensity and presence. This can lead to a reduction in energy consumption of 25-50%.

Stadiums & Arenas

Monitor and manage all AV resources, lighting, and environmental settings from one user interface. Centrally control digital signage, public address/background music systems and lighting, providing facilities managers with the tools they need to do more with less. Integrated systems are the key of simplicity and cost control.

Boardrooms & Conference Rooms

To ensure a meeting runs seamlessly from beginning to end, eVision solutions maximize your communication experience in your meeting by design, supply and control of lighting presets, projectors and projection screens, DVDs, microphones, cameras, speakers, computers, electronic voting and other audio / video equipment

In larger auditoriums, it is important to manage the challenges that come with large presentation venues. et Vision do design, supply and control the acoustics and sound systems, microphones, cameras, lighting, and other equipment involved with a speaker's presentation. We help in projecting the speaker's message to the audience, and in the audience interaction in the best way possible.

Education

Educational institutions are increasingly embracing technology in the classroom as a mean for improving academic achievement. Various digital technologies have been introduced to education over the years from projectors and televisions to computers and smart boards, and recently video and web-conferencing via the Internet. Unfortunately, these classroom technologies rarely complement each other, and the level of complexity to schedule and use the multitude of available devices make it difficult for even the most motivated educators to integrate technology into their lesson plans.

eVision design Education Solutions around the educator who without any prior training or technology experience can take control in a matter of minutes. eVision solutions include audio and video distribution system, multimedia processors, camera control, Lighting and climate control. eVision place total control at your fingertips from easy-to-use touch panels and keypads.

Systems integration through eVision control is fast, effective and reliable. Whether for a single auditorium, classroom or multi-location campus, eVision can effectively network all of your multimedia and facility operation equipment into a time-saving, cost-cutting solution. From kindergarten to universities, eVision has the perfect solution to meet your needs.

eVision has been serving the educational market for several years and truly understands the unique requirements of the academic community. Top colleges across Saudi make the grade by embracing eVision technology to control, automate, monitor and manage their campuses.

A CA

Centrally monitor, manage and control guest rooms, ballrooms and meeting rooms, restaurants, fitness and spa, pools, patios and courtyards. Activate personalized in-room welcome settings during checking, and allow guests to control the modern luxuries of advanced room automation with touchscreen simplicity.

Let your guests enjoy in-room amenities such as lighting, shade and climate control from a stylish tabletop console or directly from the tell eVision. When leaving the room, systems automatically adjust – resulting in significant energy and cost savings.

Deliver world-class hospitality and unparalleled, personalized service to leisure and business guests, and heighten property appeal to meeting planners and tradeshow managers, igniting valuable convention business growth.

On a single platform, integrate lighting and shade control, audio/ video distribution, environmental system control, asset management, room scheduling, security and more, across the entire property. eVision delivers breakthrough hotel management systems that meet and exceed the best of your needs and requirements.

Residential Solutions

. Solo

eVision

Total Home Technology from eVision streamlines and simplifies all the technology in your home offering the ultimate lifestyle of comfort and convenience.

Automated Doors, Entryways & Gates: control system can automatically lock and unlock windows, doors, and gates to ensure that the home is secure.

eVision lets you indulge in luxury with a single touch of a button. Imagine with just a single touch the lights dim, the shades close, the plasma TV turns on and your favorite movie begins. Imagine your window treatments are programmed to adjust at pre-set times to reduce glare and protect delicate fabrics and fine art from harmful direct sunlight. Imagine at night the hallway lights automatically illuminate as you walk by. Imagine what eVision, Total Home Technology experience, can bring to your lifestyle.

eVision provides homeowners with a single system approach to design, supply, install and manage of a wide range of home electronics, including:

Distributed Audio & Video.: Touch Panels can be used to control multiple zones of distributed audio and video providing customized environments for different areas of the house such as the great room, the home theater, and the pool/spa area.

Security Camera Surveillance: provide total control of intruder security systems. Strategically placed CCTV cameras outside the house can relay visitors) images to fixed points of access control. Remote Access to Whole Home Systems: Homeowners can access their residences remotely over the Internet to communicate directly with their technology. This is especially beneficial when residences are across the country or across the world.

Multiple Lighting Scenes: Personalized lighting scenes (e.g., party, romantic, nighttime) can be created to set the mood for any occasion.

Environmental Controls

A CAN

Homeowners can create a comfortable environment and help reduce their energy costs by using a control system to manage their heating, ventilation, and air conditioning systems. Pre-programmed system settings can even be used to make sure appropriate temperatures are maintained according to time of day or room usage. Personalized Sequence of Events: The control system can automatically activate certain pre-programmed events to occur according to the homeownens schedule. For example, as the homeowner approaches the front door, the control system can automatically turn on the exterior and interior lights, tune the television to a favorite channel, and adjust the heating or air conditioning to the preferred level.

Relax & Enjoy

You home is the place to relax safely surrounded by those you love, enjoy your leisure moments. Just press a button and eVision adapts to your mood. Home automation isn't just an audio multi-room, it's a reflection of your state of mind. Whatever form of entertainment you like, eVision is at your fingertips.

Add a Value to your Projects

Whether you are considering a simple upgrade or you are installing a complete building automation system, it's important to make the right choice for the long term. After all, critical comfort systems are a key way to add value to your building and create a superior environment for the people and the things in the building. Let us make the latest technology work for you. Whatever audio, visual or communication technology requirements you may have, eVision is the smart choice for ingenious solutions that will enhance your business potential and improve your life style.

eVision, entertain your soul, live the future.
